Do these problems sound familiar?

- Modelers are often unaware of *already-developed model objects*
Cause: Lack of re-usability
- Model inconsistency results in redundant and disparate information
Cause: Lack of consistent data & communication
- Models contain incorrectly named or incorrectly defined model objects
Cause: Lack of standardization
- Confusion exists regarding how to handle model reviews and approvals
Cause: Lack of procedures

If you are currently experiencing these problems, you are losing a significant amount of time, effort and money!

Marcie Barkin Goodwin is President and CEO of AXIS Software Designs, Inc., a Model Management Services, Consulting and Education company.

Axis has been providing Model Management consulting and education for over fifteen years. We understand the advantages and return on investment of modeling correctly, using standards and procedures to ensure the integrity and reusability of your models. This understanding is the foundation of all of our products and services.

Having specialized in analysis, modeling, model management administration and consulting, Ms. Barkin Goodwin has assisted her clients in the development of Model Management infrastructures across a wide variety of industries.
